Question 1 [10 Points]

Write a program that lets the user type some text, consisting of words separated by blanks and ending with a carriage return. Your program will:

1. Reverse each word's letters (do not change the order of the words).
2. Convert the reversed letters of each word to **Uppercase**.(but if a character is already Uppercase, it remains unchanged)
3. Print the transformed words in their **new** order.
